SUMMARY

Here is the career-focused version converted to "I", in simple and clear English: My future career is centered on technology, skills development, and professional growth. With my background in ICT and continuous learning, I am building a strong foundation for roles in IT, web development, or related technical fields. Through internships, hands-on experience, and certifications, I will gain practical knowledge that leads to stable employment. By staying disciplined, adaptable, and committed to improving my skills, I can achieve long-term career success and financial stability.

PROJECTS

Vista Veranda Hotel Website

May 2024- Nov 2022

Technologies: HTML, CSS, JavaScript, UI/UX Design

- Created a modern and responsive hotel website showcasing rooms, services, gallery, and booking information. Emphasized professional layout, branding consistency, and user-friendly navigation.

Smart city Information System

Jan 2026- Present

Technologies: HTML, CSS, JavaScript, Java, MySQL

- Creating a preschool management system to digitize everyday academic and administrative tasks. Student records, teacher data, attendance, and parent correspondence are all managed by the system. A user-friendly web interface was implemented to improve efficiency and simplify preschool operations.

Smart Home System (Arduino-Based)

July 2025- Nov 2025

Technologies: Arduino, Sensors, IoT, Web Dashboard

- Designed and implemented a smart home solution enabling remote monitoring and control of home appliances. Integrated sensors for automation and developed a basic web interface for real-time status monitoring.

EDUCATION

BT.hons Infomation and Communication Technology

Jan 2024- present

Sir John Kotelawala Defence University

ADDITIONAL INFORMATION

- **Technical Skills:** Perfect with HTML, CSS, Java, React, Figma
