I am a motivated undergraduate with a strong interest in frontend web development and creating modern, user-friendly applications. I have gained experience through academic and team projects, where I developed my skills in coding, UI/UX design, and problem-solving. I am passionate about learning new technologies and improving my abilities. I am eager to grow and contribute to a dynamic and forward-thinking environment while building efficient and scalable solutions.

Skills

- **Technical skills** – HTML , CSS , Java , C++ , Tailwind CSS , React , WordPress , Git & GitHub |Figma
- **Soft skills** – Adaptability, critical thinking, teamwork, communication skills, problem-solving, time management, attention to detail, leadership, creativity, decision-making.
- **Language skills** – Sinhala ,English(Intermediate)

Projects

Hotel management system (HTML, CSS, JavaScript)- (First year project)

- Designed and developed a responsive web interface using HTML, CSS, and JavaScript.
- Implemented features for room booking, reservation handling, and billing management.
- Improved system workflow to support efficient hotel operations.

Smart Home Security System (C++)- (Second year project)

- Designed and developed an IoT-based home automation system using C++.
- Integrated features for security control, device management, and energy monitoring.
- Improved system performance by enabling real-time data processing.

Design & Develop an Online Shopping Android Mobile Application(Third year project ongoing)

- Designed and developed a modern shopping application using Native Android (Java), Flutter, and React Native.
- Created a user-friendly interface with easy navigation using Figma for UI/UX design.
- Implemented features such as add-to-cart, chatbot support, and doorstep delivery within specified areas.

Design & Development of a Vehicle Dealership Website(ongoing)

- Designed and developed a responsive vehicle dealership website using HTML, CSS, and JavaScript.
- Created user-friendly sections for inventory management, vehicle details, and customer interaction.
- Implemented features such as a payment calculator, chatbot support, and easy navigation for improved user experience.

Design & Development of a Bakery Website(ongoing)

- Designed and developed a responsive bakery website using WordPress.
- Created a user-friendly interface with easy navigation for browsing products and placing orders.
- Implemented features such as add-to-cart functionality, chatbot support, and online ordering for improved customer experience.

Education

**General Sir John Kotelawala Defense University - Bachelor Hons in Information Communication Technology
(March 2024 – Present)**

NIBM University - Advanced certificate In English

Ananda Sastralaya National School Mathugama -G.C.E. Advance Level Examination 2022(23)

Ananda Sastralaya National School Mathugama - G.C.E Ordinary Level Examination 2019

Certifications

- Web Design For Beginners (University of Moratuwa)
- Web Designing (Ministry of Education)
- JavaScript Master Course From Beginner to Expert Developer(Udemy)
- Foundations of Web Development: CSS, Bootstrap, JS, React(Udemy)
